INTRODUCTION TO DEMOGRAPHY

Teacher responsible: C. Bagavos

compulsory (C) or selection (S) course	year	winter (W) or spring (S) semester
C	2nd	W

The course aims at introducing students on the basic principles of the study of population. Knowledge of the measurement and the analysis of factors affecting demographic phenomena (fertility, mortality, migration) and population trends are the main scope of the course.

- Reading list:
- Tsaoussis, D.G., 1997. *Social Demography*. Athens: Gutenberg (in Greek).
 - Tapinos, G.P., 1993. *Elements of Demography*. Paris: Armand Colin (translated into Greek).
